

CAP's Full Commitment to COVID Protocol and Procedures

Children Awaiting Parents is fully committed to the health and safety of our staff, interns, volunteers, visitors, and our CAP families during this COVID pandemic, and we adhere to all CDC recommendations.

In addition, CAP has developed an internal set of procedures that rises above the recommendations to ensure the wellness and safety of all our CAP families. CAP continues mandatory masking, distancing, complete wellness screening and disinfecting in our space and with our families.

CAP follows best practices guidelines when interacting internally and externally. All staff and visitors are screened upon entering, and all families are provided with wellness check-ins and a confirmation of a safe/well staff prior to interactions.

We will continue to provide the utmost safety and information to the CAP community throughout the course of this pandemic.
